Safety Data Sheet (SDS)  
Established Date: 20/June/2018

1. Identification of the Substance and of the Company

Product Identifier:
Cemented Carbide (include the coated or surface treated Cemented Carbide)

Supplier Information:
Company Name: SANALLOY INDUSTRY CO., LTD
Address: 290-44 Takahashi Fukusaki-cho Kanzaki-gun Hyogo 679-2216
Contact Department: Engineering Department
Phone Number: +81-790-24-2280
FAX Number: +81-790-24-2290
Emergency Phone Number: +81-790-24-2280

Recommended Use and Restrictions on Use of the Cemented Carbide
Cutting tools mainly for metallic materials, wear-resistant tools for plastic forming process, tools for macadam, civil engineering, and urban development, etc.

Attention to the Phase/State of the Cemented Carbide
• Cemented Carbide as solid state like cutting tools is chemically stable and safe at explosive, flammable, combustible, pyrophoric, water-reactive, and oxidizability under normal environment.
• Cemented Carbide is safe for use as the cutting tools (grinding, machining, rolling for metals) under normal condition.
• This SDS informs about the dust, fume or vapor which occur from Cemented Carbide producing process such as raw material powder handling and grinding.

2. Hazard Identification

The GHS Classification
Some data (such as the burning rate test data, etc.) for the dust, fume or vapor which occur from Cemented Carbide producing process are unavailable. Therefore, they are not be classified by GHS.

In here, GHS classification of the each metallic ingredients (cobalt, nickel and chromium) for composing the Cemented Carbide can be disclosed. In addition, other hazards and harmful effects (for health, environment, physical and chemical) which are not listed are unclassifiable or non-applicable by GHS.

GHS classification for the hazards of cobalt alone in below,  
(When cobalt is included as ingredients of Cemented Carbide.)

<table>
<thead>
<tr>
<th>Health Hazard</th>
<th>Category</th>
</tr>
</thead>
<tbody>
<tr>
<td>Respiratory sensitization</td>

### Hazard Statements
- **Cobalt:**
  - Risk of causing allergies, asthma or breathing difficulties if inhaled.
  - Risk of causing an allergic skin reaction.
  - May cause cancer.
  - May cause adverse effects on fertility or the unborn child.

- **Nickel:**
  - Risk of causing allergies, asthma or breathing difficulties if inhaled.
  - Risk of causing an allergic skin reaction.
  - May cause cancer.
  - Respiratory and kidney disorders
  - Cause of respiratory toxicity

- **Chromium:**
  - Risk of causing allergies, asthma or breathing difficulties if inhaled.
  - Risk of causing an allergic skin reaction.
  - Suspected of causing genetic disease
  - Failure to systemic toxicity
| Precautionary Statements | · Risk of respiratory irritation.  
· Cause of respiratory failure due to long-term or repetitive exposure.  
· May be harmful to aquatic life due to long-term effects |
|-------------------------------------------------|-------------------------------------------------|
| · Risk of respiratory irritation.  
· Cause of respiratory failure due to long-term or repetitive exposure.  
· May be harmful to aquatic life due to long-term effects |

### Precautionary Statements:

**【Prevention】**
- Obtain safety instructions* before use.
- Do not handle until all safety precautions have been read and understood.
- Use appropriate personal protection and ventilation system keeping away from exposure.
- Wear suitable protective gloves.
- When insufficient ventilation, wear respirator as required.
- Do not breathe dust, fume or vapor.
- Do not eat, drink or smoke in handling area.
- Wash skin thoroughly after handling.
- Do not release into the environment.

**【Responses】**
- If inhaled, move to fresh air and take a rest with posture easy to breathe.
- If respiratory symptoms occurs, contact a doctor.
- When feeling ill, get medical advice/attention.
- Take off contaminated clothing and wash before reuse.
- If on skin, rinse away immediately with a large amount of water and soap.
- If skin irritation occurs, contact a doctor and get medical advice/attention.
- If exposed or concerned, get medical advice/attention.
- If dust is in eyes, immediately wash away with clean water (remove the contact lenses if possible). If irritation persists, get medical advice/attention.
- If a large amount of dust is swallowed, get medical advice/attention after ingesting plenty of water to dilute.

**【Storage】**
- Avoid sudden changes of temperature and high humidity for storage.

**【Disposal】**
- Dispose of contents/container to an approved waste disposal plant under the laws.

*For safety instructions, refer to the Japan Cutting & Wear-resistant Tool Association website (http://www.jta-tool.jp/).

### 3. Composition/Information on Ingredients

- Distinction between substance and mixture: Mixture (alloy)
- Cemented Carbide may be coated or surface treated with the following substances:
- Ingredients and concentration or concentration range (composition) of the Cemented Carbide

</tbody>
</table>

*For the details regarding the content of the designated chemical material such as cobalt, nickel, chromium, and vanadium carbide (effective digit: 2), please contact to the above supplier.

**Even if the Cemented Carbide do not contain cobalt, nickel, chromium as an active ingredient may include cobalt, nickel, chromium as an impurity.

4. **First-Aid Measures**
   **If Inhaled**
   - If the high concentration of dust is inhaled or respiratory symptoms (coughs, gasping, shortness of breath, etc.) are experienced, move to fresh air and take a rest with posture easy to breathe. If breathing difficulties occur, administer oxygen inhalation. If breathing has stopped, immediately administer artificial respiration and get medical advice/attention.
   - If irritation or rash persists, get medical advice and attention.

   **If on Skin**
   - If dust is contacted with skin, take off contaminated clothing and rinse the affected area with soapy water thoroughly. If irritation or rash persists, get medical advice/attention.

   **If in Eyes**
   - If dust is in eyes, immediately wash away with clean water (remove the contact lenses if possible). If irritation persists, get medical advice/attention.

   **If Swallowed**
   - If a large amount of dust is swallowed, get medical advice/attention after ingesting plenty of water to dilute.

5. **Fire-Fighting Measures**
   **Extinguishing Media**
   - To extinguish the fire of dust, use dry sand, expanded vermiculite, dilatable perlite, ABC type (general, oil, electric fire) powder extinguishers or water (no water allowed for the dust containing cut powders of light metal such as magnesium and aluminum).

   **Special Protective Actions for Fire-Fighters**
   - In fighting a fire, wear a protective clothing, dust-proof respirator or respiratory protective equipment.

6. **Accidental Release Measures**
   **Personal Precautions**
   - It is recommended that someone who cleans dust should wear clothing and respiratory protective equipment to minimize exposure.

   **Environmental Precautions**
   - Dispose of dust as industrial wastes and prevent release in water systems.

   **Containment and Cleanup Methods and Equipment**
• If there is dust which occur from Cemented Carbide producing process, isolate the area and remove with a cleaner equipped with a filter which can take up fine particles very efficiently. If appropriate removing methods are not available, sweep with water sprayers or wet mops.

7. Handling and Storage

Handling
• If the disperse of dust containing cobalt or nickel is concerned, provide local exhaust ventilation and use personal protective equipment to minimize exposure to human body.
• Obtain safety instructions before use.
• Do not handle until all safety precautions have been read and understood.
• Do not breathe dust, fume or vapor.
• Do not eat, drink or smoke in handling area.
• Wash skin thoroughly after handling.
• Do not release into the environment.

Storage
• Avoid sudden changes of temperature and high humidity for storage.

8. Exposure Controls/Personal Protection

Exposure Prevention
• Permissible concentration in working environment (reference value)

*OSHA : Occupational Safety & Health Administration U.S. Department
*PEL : Permissible Exposure Limit
*ACGIH : American Conference of Governmental Industrial Hygienists Inc.
*TLV : Threshold Limit Value
*N/A : Not Applicable

• Facility measures

Provide local exhaust ventilation so that dusts in the air may not exceed the exposure limits in the above table. It is to be noted that management concentration of the cobalt (and its inorganic compounds) is to be 0.02mg/m³ in accordance with the working environment assessment standard by Japanese Minister of Health, Labour and Welfare under the paragraph (2), Article 65-2 of the Industrial Safety and Health Act in Japan.

In addition, cobalt (and its inorganic compounds) in the storage or handling, and that to take the necessary action conforming to the Ordinance on Prevention of Hazards due to Specified Chemical Substances.
Protection Measures

- **Respiratory Protection:** Dust-proof respirators and respiratory protective equipment are recommended.
- **Hand Protection:** Protective gloves for dust are recommended.
- **Eye Protection:** Protective glasses for dust are recommended.
- **Skin/Body Protection:** Avoid direct skin contact. Clean up deposited dust on clothing, rags, etc. by washing or absorbing with suitable filters but not by whisking off. Change the contaminated clothing into clean one.

Hygiene Measure

Wash skin thoroughly after handling.

9. **Physical and Chemical Properties**

   **Appearance:** Dark gray color
   (in case of the coated or surface treated cemented carbide, the appearance color is often different.)
   **Odor:** Odorless
   **pH:** No data available
   **Melting Point:** No data available
   **Boiling Point:** No data available
   **Flash Point:** No data available
   **Vapor Pressure:** No data available
   **Specific Gravity:** 11.0 - 15.5
   **Solubility:** Insoluble

10. **Stability and Reactivity**

    A grain of dust which occur from Cemented Carbide producing process is very fine and under the specific conditions in which the dusts are mixed with grinding oil with low flash point, it is possible to become pyrophoric. If dusts under very flammable conditions are dispersed in the air, it is possible to explode.

    The each metallic ingredients (cobalt, nickel and chromium) for composing the cemented carbide has the following information about stability and reactivity under specific conditions.

    Stability and reactivity of cobalt alone in below,
    (When cobalt is included as ingredients of Cemented Carbide.)
    **Stability:** Stable to heat and contact with water
    Ignite spontaneously in air
    **Hazardous reactions:**
    It reacts with strong oxidizing agents
    It reacts violently with oxygen, and it poses a risk of fire or explosion
    It reacts violently with acid to generate hydrogen
    **Conditions to avoid:**
    Contact with incompatible materials
    **Incompatible materials:**
    Strong oxidizing agents, acid
    **Hazardous decomposition products:**
    By combustion, cobalt oxide and fumes of cobalt oxide may occur

    Stability and reactivity of nickel alone in below,
    (When nickel is included as ingredients of Cemented Carbide.)
    **Stability:** It is considered stable in storage and handling in accordance with the laws and regulations
Hazardous reactions: Metallic nickel is usually stabilized against oxidation by the oxide film, fresh metal surfaces without oxide film is rapidly oxidized by air. Thus, fresh metallic nickel powder, there is a risk of ignition in air.

Conditions to avoid:

Hazardous decomposition products: No data available

Stability and reactivity of chromium alone in below, (When chromium is included as ingredients of Cemented Carbide.)

Stability: Stable under normal handling conditions

Hazardous reactions: Reacts violently with strong oxidizing agents such as hydrogen peroxide, it poses a risk of fire or explosion.

It reacts with dilute hydrochloric acid and dilute sulfuric acid.

Conditions to avoid: The alkali or alkaline carbonate is Incompatible.

When mixed with air in powder or granular form, there is a possibility of dust explosion.

Incompatible materials: Strong oxidizing agents, dilute hydrochloric acid, dilute sulfuric acid, alkali, alkali carbonate

Hazardous decomposition products: During combustion, there can be irritating or toxic fumes and gases.

11. Toxicological Information

Acute Toxicity: No data available on Cemented Carbide

Skin Corrosion/Irritation: No data available on Cemented Carbide

Serious Eye Damage/Eye Irritation: No data available on Cemented Carbide

Respiratory or Skin Sensitization: No data available on Cemented Carbide

Germ Cell Mutagenicity: No data available on Cemented Carbide

Carcinogenicity: Group 2A on IARC, as cobalt powder coexisting with tungsten carbide powder. Suspected to be carcinogenic in humans (Ref.1)

Reproductive Toxicity: No data available on Cemented Carbide

Specific Target Organ Toxicity/Systemic Toxicity: No data available on Cemented Carbide

(Single Exposure)

Specific Target Organ Toxicity/Systemic Toxicity: No data available on Cemented Carbide

(Repeated Exposure)

Aspiration Hazard: No data available on Cemented Carbide

12. Ecological Information

The aquatic environment acute hazard

• Not reported on Cemented Carbide

The aquatic environment chronic hazard

• Not reported on Cemented Carbide

Mobility

• Not reported on Cemented Carbide

13. Disposal Considerations

Safe and environmentally desirable disposal method

• The main ingredients such as tungsten carbide, cobalt, nickel are rare metal. It is desirable to collect and recycle them.
• For disposal, conform to the applicable laws regarding industrial wastes such as ‘Waste Disposal and Public Cleansing Law’ and relevant local by laws.

14. Transport Information

International Regulations
UN Number: Not applicable
UN Hazard Class: Not applicable
Marine Pollutant: Not applicable

*When transporting a powder of metallic ingredients (cobalt, nickel) for composing the Cemented Carbide, there is a possibility that it is necessary to take appropriate action in accordance with the relevant provisions established by IMO (International Maritime Organization), ICAO (International Civil Aviation Organization), IATA (International Air Transport Association).

Domestic Regulations
Land Regulatory Information: Not applicable
UN Number: Not applicable
UN Hazard Class: Not applicable
Marine Pollutant: Not applicable

*When transporting a powder of metallic ingredients (cobalt, nickel) for composing the Cemented Carbide, there is a possibility that it is necessary to take appropriate action in accordance with the relevant provisions of Ship Safety Law and the Aviation Law.

Special Safety Measures
When transporting the dust which occur from Cemented Carbide producing process, make sure that there is no damage or corrosion or leakage of the container, to ensure implementation of the prevention of collapse of cargo.

15. Regulatory Information

• Law for Pollutant Release and Transfer Register (PRTR)
Vanadium carbide: “Class 1 designated chemical substances”, Cabinet Order No.321
   Cobalt: “Class 1 designated chemical substances”, Cabinet Order No.132
   Nickel: “Class 1 designated chemical substances”, Cabinet Order No.308
   Chromium: “Class 1 designated chemical substances”, Cabinet Order No.87

• Industrial Safety and Health Law, Ordinance on Prevention of Hazards due to Specified Chemical Substances
   Cobalt: The substances are defined in the Article 57-2 of the Act, and the cobalt is listed by No.172 in Appendix Table9 in the Article 18-2 of the Enforcement Order as “Dangerous or Harmful Substances to be notified their names, etc.”
   Article 2, Paragraph 1, Items 2 and 5 of Ordinance on Prevention of Hazards due to Specified Chemical Substance, Specified chemical substance class 2, Management class 2.
   When the content of cobalt and cobalt oxide is less than 1%, the Ordinance on Prevention of Hazards due to Specified Chemical Substance is not covered.

   Nickel: The substances are defined in the Article 57-2 of the Act, and the nickel is listed by No.418 in Appendix Table9 in the Article 18-2 of the Enforcement Order as “Dangerous or Harmful Substances to be notified their names, etc.”
Chromium: The substances are defined in the Article 57-2 of the Act, and the chromium is listed by No.142 in Appendix Table9 in the Article 18-2 of the Enforcement Order as “Dangerous or Harmful Substances to be notified their names, etc.”

16. Other Information

**Other Hazardous Information**

The following attention should be paid for dust which occur from Cemented Carbide producing process.

- If a large amount of dust containing cobalt is inhaled, blood, heart, thyroid gland, and spleen disorders may result. (Ref.2)
- It is reported that repeated or prolonged contact with cobalt, nickel, or chromium may affect skin, respiratory organs, heart, etc. (Ref.3-6)
- For carcinogenicity of metallic ingredients of cemented carbide has the following knowledge.
